Dear Mr. Bianco,

We don't need more gas infrastructure. Why is this administration paying lip-service to sustainability while pushing more investments in carbon-emitting facilities? We need leaders who pursue what Rhode Islanders want -- sustainable energy, not more gas.

Protect our climate, our water, and the next generation of Rhode Islanders by rejecting Inenergy's Burrillville Power Plant proposal.

Sincerely,

Mark Goldberg-Foss

Dear Mr. Bianco,

I urge you to reject the fracked gas power plant proposed for Burrillville. Simply put, this power plant would take Rhode Island in the wrong direction.

There are serious concerns about local air and water pollution wherever a fracked gas power plant is built and operates, resulting in environmental and health concerns. If built, this plant would use thousands of gallons of Rhode Island's water and generate huge amounts of wastewater every single day. And it would promote fracking and accelerate climate change. Moreover, energy analysis and grid operators have proven that there isn't even a demand in the region for this power plant.

Burrillville residents deserve better than this fracked gas Invenergy plant. Rhode Island's future deserves better, too.

Protect our climate, our water, and the next generation of Rhode Islanders by rejecting Inenergy's Burrillville Power Plant proposal.

Sincerely,

Janice DAntuono

Moreover, energy analysis and grid operators have proven that there isn't even a demand in the region for this power plant.

Burrillville residents deserve better than this fracked gas Invenergy plant. Rhode Island's future deserves better, too.

Our state is top heavy with natural gas supplying the bulk of our energy. RI is contributing significantly to production and distribution of a dirty and finite fuel. It is time to diversify the resource pie.

Can you hold your head high if you choose to vote to severely compromise a region that is an environmental treasure in RI?

Claudia Gorman Middletown RI

Protect our climate, our water, and the next generation of Rhode Islanders by rejecting Inenergy's Burrillville Power Plant proposal.

Sincerely,
